

Get early access to private placement offerings. Freely accessible within a robust and compliant framework!

Nexthash launches world's first IEO backed by its EU regulated exchange Nexinter to enable private sale participation of **Security Token Offering (STO)** or **Digital Security Offering (DSO)**.

The main goal is to drive **financial inclusion** of traditional and new classes of investors in the digital securities market and to deliver frictionless experience.

Nexthash will **disrupt the \$1.6 trillion private placement market**. The **Nexinter IEO** is just the first step.

Nexinter Products and Services

The goal of NIXT

The goal of NIXT - Nexinter IEO (Initial Exchange Offering) is three-fold:

- 1. ENGAGEMENT:** to build a new digital engagement as early as possible with new categories of traders, with full focus on compliance and security
- 2. INCLUSION:** to build a leaner "Digital Security Offering" framework by starting to engage at earlier stage with companies that have planned to launch a DSO (Digital Security Offering) and provide them the benefit of an end-to-end competitive and transparent offering
- 3. ADOPTION:** to leverage upon such an engagement to build the most liquid, user friendly and competitive end-to-end Digital Security Offering Platform in the world, to drive a broader inclusion to the financial world

NIXT token holders will receive the benefit to participate in Nexinter Private Placements of Digital Security Offerings as early as professional investors with exactly the same conditions.

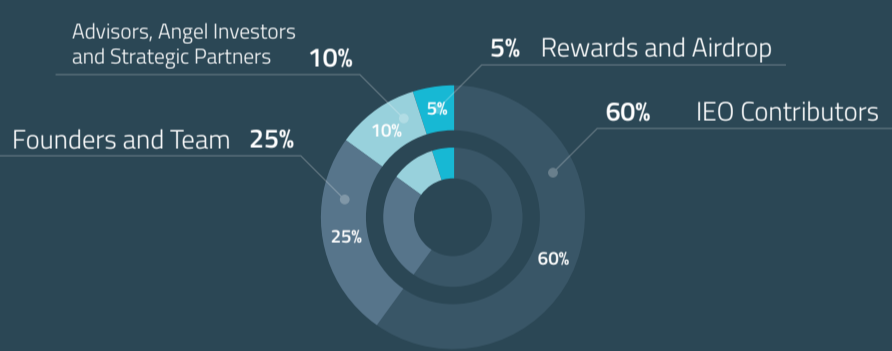

NIXT token holding benefits
